

Cadaveric Structure Holder

Part #: SPH-10

Price: \$55.00 USD

Size: 12" h; 5.5" w; 1.5" d

Weight: .2 lbs

Rigid plastic form with tie down locations for cadaveric specimen placement during procedural and skill training. The durable plastic tool is easy to wash and disinfect. Its rubber feet keep the tray and specimen from moving while completing tasks.

Skill Development:

- » Suturing
- » Dissecting
- » Incising

Features and Benefits:

- » Washable and reusable
